Bosch Family of Quick Change Hole Saws Is Enlarged *New Hole Enlarger Kit Allows For Quick and Accurate Re-Cuts*

Mount Prospect, Ill. – Bosch Power Tools and Accessories has introduced the perfect solution when a hole is cut too small or larger materials need to fit in an existing hole. Bosch's new Hole Enlarger Kit allows users to cut a precise enlarged hole without using a pilot bit.

Users only need to attach a hole saw matching the desired size hole to the enlarger nut and then attach the cup that corresponds to the original hole size. The inner cup acts as a pilot guide allowing the outer cup to cut a clean and accurate hole.

The hole enlarger nut has two thread profiles, 1/2" and 5/8", to accommodate any size cup from 9/16" to 6" in any configuration - perfect for cutting door locks, retro-fitting conduit, and correcting errors.

The Hole Enlarger Kit comes with Bosch's quick change mandrel and the hole enlarger nut. The kit works with all 53 of Bosch's bi-metal hole saw cups and fits most major brand hole saws as well.

Visit www.boschtools.com to find a Bosch Accessories dealer in your area.
