Bosch Tools. The *Hole Enlarger Kit* fixes holes that are cut too small or widens old holes that won't fit larger materials. Users enlarge holes by attaching a hole saw, which matches the desired hole size, to an enlarger nut, then attaching a cup matching the original hole size. The inner cup acts as a pilot guide, allowing the outer cup to cut a clean hole. Two thread profiles accommodate cup sizes from $\frac{9}{16}$ inches to 6 inches. Kits work with Bosch's bi-metal hole saw cups and most major brand hole saws. 877.267.2499. www.boschtools.com. **Circle 121.**

Crossville. Add a punch of color or a subtle accent with *Glass Blox tiles* in a palette of 44 colors. All solid colors come in 1-inch square mosaics, 2-inch-by-4-inch rectangles, linear bars, and 4-inch square tile. Blends are available as mosaics and liners. A percentage of the profits from these products is donated to the Common Thread for the Cure, a foundation that supports families in the furnish-

Clopay Building Products.

Gallery Collection garage doors feature a layer of chlorofluorocarbon free polystyrene insulation pressure bonded between two sheets of 24-gauge steel. The designs offer both long- and short-grooved panels that can combine with insulated square, rectangular, or arched windows. Decorative handles and window options are available for the doors, which measure 6 feet to 12 feet high and up to 20 feet wide. They come in four colors and can be painted. 800.225.6729. www.clopaydoor.com **Circle 123.**
