FOR MORE PRODUCT INFORMATION, DIRECT FROM THE MANUFACTURER, VISIT [WWW.ECMAG.COM/INFO](http://WWW.ECMAG.COM/INFO)

## SOLDERING TOOLS

American Beauty's ultra-high-heat plier-style resistance soldering tools provide instantaneous, localized heat from cold to more than 1,000°F in less than one second, depending upon the application. They have plier-style handpieces, so heat is concentrated directly at the solder joint. These footswitch-actuated systems allow "cold fixture" setup before soldering. They are designed for soldering large, single-wire terminations up to 0 AWG into terminal lugs, electrical splices and multipin connectors.

Handpieces come in a variety of sizes for confined spaces and special applications. VISIT [WWW.ECMAG.COM/INFO](http://WWW.ECMAG.COM/INFO)

## HAND TOOLS

Greenlee's line of professional hand tools includes several for metric use, such as a nine-piece folding hex-key metric set, combination ratcheting metric wrench, a 21-piece metric tools kit and a metric tape measure.

Hand tools with molded or dripped-grip handles include side-cutting grip pliers with stripping hole, dipped grip adjustable wrenches and pliers.

Also available are a straight claw hammer, crank-action screwdriver, stubby square-recess tip driver, multicable cutter, irrigation tool

kit and a bottle opener. VISIT [WWW.ECMAG.COM/INFO](http://WWW.ECMAG.COM/INFO)

## HOLE SAW

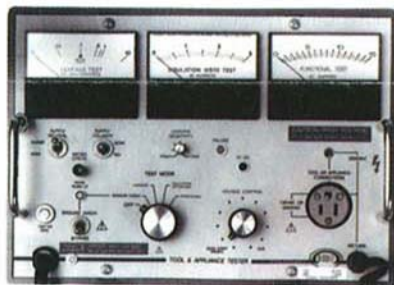

Bosch Power Tools and Accessories' carbide hole saw can cut through wood, ceramic tile (floor and wall), brick and cinder block, cement board, fiber cement board, and plastic. It has diamond-ground carbide teeth and drop-shaped chip clearance slots for chip and dust removal. The saw is available in 19 different cups, ranging from 1-4<sup>1</sup>/<sub>8</sub> in.

A two-piece set is available, which contains two carbide-tipped pilot bits and a quick-change mandrel (1<sup>3</sup>/<sub>8</sub> in.). The eight-piece set includes five carbide cups, ranging from 1<sup>3</sup>/<sub>16</sub>- to 2<sup>1</sup>/<sub>4</sub>-in., and the five-piece set has two cups: 3<sup>1</sup>/<sub>4</sub>- and 4<sup>1</sup>/<sub>8</sub>-in.

## TESTER

Megger's tool and appliance tester performs tests of ground continuity, leakage current and electrical insulation. It also checks the nameplate current

rating of the device. It completes UL and ANSI testing in less than one minute, and a ground check bypass switch permits testing of two-wire or double-insulated devices. There is a front-panel NEMA 5-15 output receptacle, with adapters available to convert to a 20A plug or twist lock up to 30A. Test procedures are color-coded in sequence on the front panel, and a removable lid with metal tray holds devices under test. The tester weighs 28 lb. and measures 10-by-13<sup>1</sup>/<sub>2</sub>-by-10 in. VISIT [WWW.ECMAG.COM/INFO](http://WWW.ECMAG.COM/INFO)
